

Alex G. Kim

Lawrence Berkeley National Laboratory, 1 Cyclotron Rd, MS: 50R6048, Berkeley, CA 94720-8164, agkim@lbl.gov

Education	Ph.D., Physics, University of California, Berkeley, Dec. 17 1996. <i>The Discovery of High-Redshift Supernovae and Their Cosmological Implications</i> , Richard Muller & Saul Perlmutter advisors M.A., Physics, University of California, Berkeley, 1994. B.S., Physics, Mathematics, University of Michigan, Ann Arbor, 1991.
Professional Experience	2003– Staff Scientist, Physics Division, Lawrence Berkeley National Laboratory 2002–2003 Term Scientist, Physics Division, Lawrence Berkeley National Laboratory 1999–2002 Research Assistant, Center for Particle Astrophysics and Lawrence Berkeley National Laboratory 1997–1999 Research Associate, Laboratoire de Physique Corpusculaire et Cosmologie, Collège de France 1992–1997 Research Assistant, Center for Particle Astrophysics and Lawrence Berkeley Laboratory 1989–1991 Research Assistant, Physics Department, University of Michigan
Honors and Awards	2018 Invited Professorship, University of Lyon 2014 Breakthrough Prize 2007 Cosmology Prize, Gruber Foundation 1991 Phi Beta Kappa 1989–1990 Northern Telecom Scholarship, Northern Telecom Inc., Vienna, Va. 1988–1990 Franklin Tillery Scholarship 1988–1989 David Aspland Scholarship 1988 William Branstrom Freshman Prize 1987–1991 Angell Scholar
Teaching Experience	2013 University of California, Berkeley. Astro 260 Guest Lecturer 2000–2002 Tutor, Malcolm X Elementary School, Berkeley CA 1991–1992 University of California, Berkeley. Teaching assistant
Professional Memberships	American Astronomical Society
Relevant Committees, and Service	OzDES Deputy Spokesperson, 2018 – Future Sky Surveys and Big Data, Scientific Organizing Committee, 2016 DES Publications Committee, 2015 – LSST-DESC Collaboration Council, 2014 – DOE National Lab Day Committee, 2014 LSST Cadence Workshop, Supernova Working Group co-Chair, 2014 LBNL Diversity and Inclusion Committee, 2014– OzDES Executive Committee, 2013 – Distances Task Leader, Snowmass, 2013 LSST-DESC SN Ia Working Group Co-Chair, 2012–2015 DES Spring 2013 Collaboration Meeting, Local Organizing Chair, 2012–2013 Publications Committee, Nearby Supernova Factory, 2012– SN Ia Working Group Leader, LSST DESC, 2012–2014 DES Spectroscopy Task Force Co-Chair, 2011– 2014 DES Collaboration Meeting Steering Committee, 2011– Referee for DOE-Office of Science proposals, 2010– Referee for Astrophysical Journal, Astroparticle Physics, Journal of Cosmology and

Astroparticle Physics, Publications of the Astronomical Society of the Pacific, Publications of the Astronomical Society of Australia, Astrophysical Journal Letters 1997–
 Research supervisor for numerous students and postdocs, 1997–
 Member of several doctoral thesis committees 2008–
 SN Ia Spectroscopy Group leader, DES collaboration, 2008–2012
 Joint Dark Energy Mission Interim Science Working Group, 2010–2011
 Science Fair Judge, North School Hillsdale, CA Mar 2 2010
 SN Ia Working Group leader, SNAP Collaboration, 2001–2009
 Simulation Working Group leader, SNAP Collaboration, 1999–2009
 System Managers Group member, SNAP Collaboration, 2001–2008
 Review Presentation, Particle Physics Project Prioritization Panel (P5), Stanford, CA Friday, Feb. 22, 2008
 Organizing Committee, Key Approaches to Dark Energy, Barcelona, Aug, 2006
 Internal Review Committee, Supernova Factory, 2004

Research Activities

1999–present — Lawrence Berkeley National Laboratory

- Dark Energy Spectroscopic Instrument – Identifying non-BAO science applications for DESI. Target selection.
- Large Synoptic Survey Telescope - Dark Energy Science Collaboration – Leading preparations for exploitation of supernovae discovered by LSST. Optimization of observing strategy.
- Euclid Consortium – Developing hardware and mission requirements for the SN Ia/transient survey.
- OzDES – Forming member of the collaboration formed to get spectra of targets identified by DES. Collecting DES targets and furnishing them to the observers.
- Dark Energy Survey – Working on the optimization of the DES supernova survey and setting requirements on external spectroscopic observations. Leading the spectroscopy component of the full collaboration.
- Nearby Supernova Factory – Improving the calibration of Type Ia supernovae as distance indicators. Developing a toolkit for generalized spectroscopy pipelines including high-performance computing and forward-modeling.
- Joint Dark Energy Mission – Developing science requirements, survey strategies, and mission configurations for a NASA and DOE interagency satellite experiment intended to probe dark energy. Participation as a member of the JDEM-Interim Science Working Group charged with designing mission concepts for the two agencies.
- Supernova Acceleration Probe (SNAP) Collaboration– Developed and implemented a simulation package, science requirements, survey strategies, and mission configurations for a proposed satellite experiment designed to probe dark energy. Led two collaboration working groups. Contributions led to the successful passing of scientific reviews and advocacy by national committees. Work on the supernova error budget and systematic uncertainties has resulted in several published papers with more in progress.
- Baryon Oscillation Spectroscopic Survey – Developed and implemented the spectroscopic reduction pipeline for the BOSS experiment. The software is currently processing nightly observations.
- Supernova Cosmology Project – Working on the statistical analysis for high-redshift supernova cosmology presented in several papers.

1997–1999 — Collège de France

- AGAPE – Applied HST archival data to analyze the gravitational microlensing of unresolved source stars within the AGAPE collaboration and to search for new events, resulting in a published paper.
- EROS – Discovering and studying supernovae at low ($z < 0.2$) and high ($z > 0.4$) redshifts as part of the EROS supernova search and the Supernova Cosmology Project. The supernovae are used to measure cosmological parameters. Work has led to papers on supernova rates and the cosmological distance scale.
- Planck – Developing algorithms and software simulating the data expected from the Planck mission, a satellite that measures CMB temperature anisotropies. My focus was in determining hardware constraints, optimized scanning strategies, and data processing methods for polarization measurements. Findings have been published.

1992–1997 — Lawrence Berkeley National Laboratory

- Deepsearch (SCP) – Discovered and studied over 28 distant supernovae, $0.35 < z < 0.85$, in a project aimed at measuring the mass density of the universe and the Cosmological constant. Involved in developing search software, observing, and data analysis. Resulted in the discovery of the accelerated expansion of the Universe.

Invited Talks

Speaker, LSST Community Broker Workshop, Seattle, Jun 21, 2019
 Speaker, ZTF 2 Workshop, Japan, Feb 7, 2019
 Lecturer, University of Lyon, France, Sep 26, 2018
 Keynote Speech, Slurm User Group Meeting, LBNL, Sep 25, 2017
 Lecturer, SLAC Summer Institute, SLAC, Menlo Park, CA, Aug 23, 2017
 RPM, Physics Division, Lawrence Berkeley National Laboratory, Berkeley, CA, Oct 18, 2016
 Colloquium, Laboratoire de Physique Corpusculaire de Clermont-Ferrand, Aubiere, France, Sep 30, 2016
 Southern Spectroscopic Survey Instrument Workshop, Argonne, IL, Aug 22, 2016
 Invited Talk, Future Sky Surveys and Big Data, Daejeon, Korea, Apr 25, 2016
 Invited Talk, CAASTRO Annual Retreat, Sydney, Australia, Nov 16, 2015
 Speaker, Innovative Cosmological Simulations with Machine Learning and Statistics in the era of LSST, Pittsburgh, PA Jun 5, 2015
 Colloquium, University of Oklahoma, Norman, OK, Jan 22, 2015
 Colloquium, ATPC, Dec 23, 2014
 Speaker, LSST Project and Community Workshop, Phoenix, AZ, Aug 14, 2014
 Lecture, Santa Fe Cosmology Workshop, Santa Fe, NM, Jul 22, 2014
 Speaker, DES-LSST Workshop, Fermi National National Laboratory, IL, Mar 26, 2014
 Panel Discussion, Snowmass, Minneapolis MN, July 29, 2013
 Seminar, LineA Seminar, Brazil, June 20, 2013
 Colloquium, Herzberg Institute of Astronomy, Victoria, Canada, March 12, 2013
 Lecture, IX Mexican School on Gravitation and Mathematical Physics, Puerto Vallarta, Mexico, Dec 5, 2012
 Speaker, Korean Physical Society, Oct 26, 2012
 Colloquium, Yonsei University, Oct 25, 2012
 Seminar, Asia Pacific Center for Theoretical Physics, Pohang Korea, Oct 22, 2012
 Speaker, 13th Marcel Grossmann Meeting, Stockholm, Sweden, July 1, 2012
 Speaker, Nobel Prize Panel, University of Stockholm, Sweden, Nov 12, 2011
 Lecturer, Azores School on Observational Cosmology, Angra do Heroismo, Portugal, Aug 31- Sep 6, 2011
 Seminar, Astronomy Department, Yonsei University, Seoul, May 6, 2011
 Seminar, Institute for the Early Universe, Ewha University, Seoul, May 3, 2011

Seminar, Korea Institute for Advanced Study, Seoul, May 2, 2011
 Workshop, The Return of de Sitter, NORITA, Stockholm, March 15, 2011
 Seminar, Center for Particle Astrophysics, Fermilab, May 17, 2010
 Seminar, National Astronomy Observatory of China, Beijing, Apr 8 2010
 Seminar, Institute of High Energy Physics, Beijing, Apr 7 2010
 Seminar, Institute for the Early Universe, Ewha University, Seoul, Apr 5, 2010
 Workshop, First Berkeley-Paris Dark Energy Cosmology Workshop, Paris, Sep 19, 2009
 Conference, Frontiers of Cosmology at Dome A Antarctica, Suzhou, China, Jul 21, 2009
 Speaker, Particle Physics Project Prioritization Panel (P5), Stanford, CA Friday, Feb. 22, 2008
 Workshop, International Workshop on the Interconnection Between Particle Physics and Cosmology, Texas A&M, May 14, 2007
 Cosmology Seminar, University of California, Davis, Dec 7 2006
 Workshop, Key Approaches to Dark Energy, Barcelona, Aug, 2006
 Workshop, European Dark Energy Network in Paris, Paris, Dec 9, 2005
 Workshop, Probing the Dark Universe with Subaru and Gemini, Waikoloa, HI, Nov 8, 2005
 Colloquium, University of Missouri, Columbia, Oct 3, 2005
 Seminar, Laboratoire d'Astrophysique de Marseille, Apr 3, 2003
 Astrophysics Seminar, University of California Riverside, Mar 24, 2003
 Seminar, University of Florida, Mar 17, 2003
 Colloquium, Florida Atlantic University, Mar 14, 2003
 Astrophysics Seminar, Los Alamos National Laboratory, Feb 27, 2002
 Colloquium, Purdue University, Oct 25, 2001
 San Mateo Astronomical Society, May 3, 2001
 Journal Club, Department of Astronomy, UC Berkeley, Apr 27, 2001
 Colloquium, Collège de France, Mar 18, 2001
 Colloquium, Centre de Physique des Particules de Marseille, Mar 15, 2001
 Workshop, Frontiers in Contemporary Physics-II at Vanderbilt University, Mar 9, 2001
 Colloquium, Indiana University, March 2001
 Colloquium, Observatoire de Meudon, Feb 2000
 Colloquium, Universidad de La Serena, Chile, Sep 21, 1998
 Conference, XXXIIIrd Rencontres de Moriond "Fundamental Parameters in Cosmology", Les Arcs 1800, France, Jan 17-24, 1998
 Conference, NATO Advanced Study Institute on Thermonuclear Supernovae, Aiguablava, Spain, June 20-30, 1995
